Création Projet Symfony

- symfony check:requirements
- composer create-project symfony/website-skeleton <nomProjet>
- composer require webapp
- yarn install
- yarn encore dev--watch
- composer install
- composer require logger
- symfony check:security

Fichier .env

- Version de MariaDB sur phpmyadmin
- DATABASE_URL="mysql://<db_user>:<db_password>@127.0.0.1:3306/<db_name>?serverVersion=10.4.19-MariaDB&charset=utf8mb4"

Création Premier Contrôleur

- symfony console make:controller <nomContrôleur>
- composer require annotations
- composer require twig

Hello HomeController!

This friendly message is coming from:

- Your controller at [src/Controller/HomeController.php](#)
- Your template at [templates/home/index.html.twig](#)

Installation EasyAdmin

- composer require easycorp/easyadmin-bundle
- symfony console make:admin:dashboard
- symfony console make:admin:crud

Welcome to EasyAdmin 4

You have successfully installed EasyAdmin 4 in your application.

Help us promote EasyAdmin to reach new developers

Commit sur GitHub

- `git pull origin <nomBranche>`
- `git push origin HEAD:<nomBranche>`
- `git push -force origin <nomBranche>`

Création Base de données

- `composer require symfony/orm-pack`
- `composer require --dev symfony/maker-bundle`
- `symfony console doctrine:database:create`
- `symfony console make:entity`
- `symfony console make:migration` ou `symfony console m:mig`
- `symfony console doctrine:migrations:migrate` ou `symfony console d:m:m`

Mise en place de l'authentification

- `symfony console make:user`
- `symfony console make:auth`

Mise en place de l'inscription

- `symfony console make:registration-form`
- `composer require symfonycasts/verify-email-bundle`

Hachage du mot de passe

- `composer require symfony/password-hasher`

Tests unitaires

- `symfony console make:unit-test`
- `php bin/phpunit`
- `php bin/phpunit --testdox`

Insertion de données factices

- `composer require --dev orm-fixtures`
- `composer require fakerphp/faker`
- `php bin/console doctrine:fixtures:load`

Affichage de la barre d'outils Symfony

- `composer require--dev symfony/profiler-pack`
